

Air Excel Apollo UV

An innovative offset blanket that uses the unique Kinyo closed cell compressible layer technology. A durable dedicated UV blanket designed to provide dense solid reproduction on all substrates.

INNOVATION Kinyo a major global manufacturer leads the industry with innovative blanket development. Our commitment is to continue developing and delivering innovative products that improve quality and extend blanket life on press.

TECHNOLOGY The consistency and quality of our new MicroSphere compressible layer technology and improved gauge control from our advanced buffing techniques gives a superior result, faster recovery on press, improved smash resistance and reduced gauge loss.

VALUE Improvements provided by the MicroSphere compressible layer means exceptional long life from the blanket, improving production time and reducing down-time on press.

SURFACE

Rubber compound	For dedicated UV ink systems
Surface finish	Buffed & polished
Roughness (Ra)	0.7µm
Colour	Purple

CONSTRUCTION

Compressible layer design	Closed cell
Nominal thickness	1.95mm
Fabric plies	3 plies

PHYSICAL PROPERTY

Thickness range	1.93 - 1.98mm
Overall hardness (Shore A)	81°
Micro hardness (Shore A)	55°
Tensile strength at break	> 85 N/mm
Elongation at 10 N/mm	<0.9%
Compressibility indentation at 1060 kPa	6.2%

BENEFITS

- The specially dedicated UV face compound provides maximum resistance to all the polar components of UV inks and washes.
- Tough MicroSphere compressible layer, stays stable, offering longer life on press through improved shock absorption with rapid recovery. Gives constant printing conditions with very low gauge loss.
- The durable dedicated UV face compound provides a high level of resistance to edge marking when using abrasive substrates.
- The polished micro-ground surface provides excellent halftone reproduction and excellent sheet release.
